

METAVITAL ELEMENTARY

Customized diagnostics and therapy

Status: 09.2023 II

Modular structure
for more
individuality

WORLD NOVELTY 2023

We have done it! **METAVITAL** ELEMENTARY is a modular system with the latest 4D MNLS biophoton technology which can be adapted to your individual requirements.

You have here a high-end diagnostic and therapy system that will suit you exactly. Due to the modular design, you can purchase only your preferred functions. You decide what your system should contain and how it best fits your requirements.

This is a medical system to treat both your family and your pets. Or would you like to integrate this unique diagnostic and therapy tool into your naturopathic work? In every topic you benefit from the latest innovative **METAVITAL** measurement technology which guarantees unrivalled medical sharpness and accuracy of measurement results.

Customized diagnostics and therapy

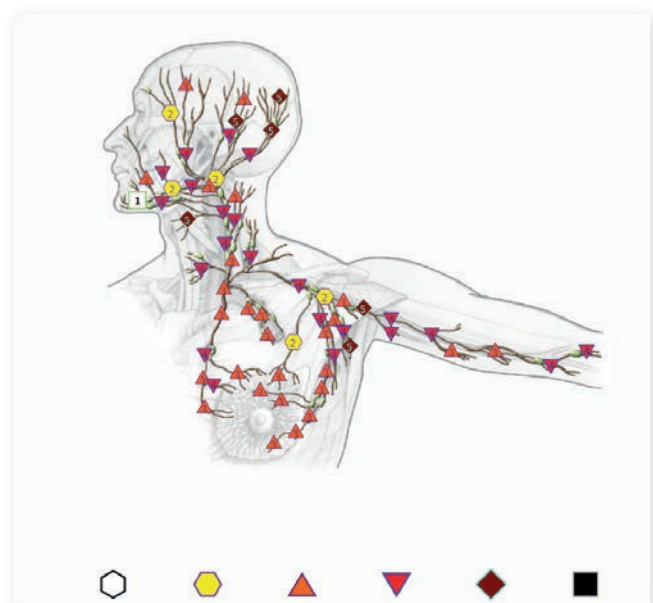

Overview of the measurement results

Our latest technology enables you and your clients to have an overview of the most important measurement results and disease tendencies found, so that you know directly what you should pay particular attention to in this person and which things appear to be a medical issue from the start. This option has the advantage that you already know the main issues from the beginning and cannot overlook anything. From the first scan, even if you are completely untrained, the system supports you and helps you to master a perfect analysis fully automatically.

Easy to use

Thanks to clear colouring and simple application, you and your clients can immerse yourself in the great world of medical analysis from the very first image and are guided through the scan by the system in the optimal sequence. Our development is extremely practice-oriented and brings you real added value both in the private sphere and in medical practice.

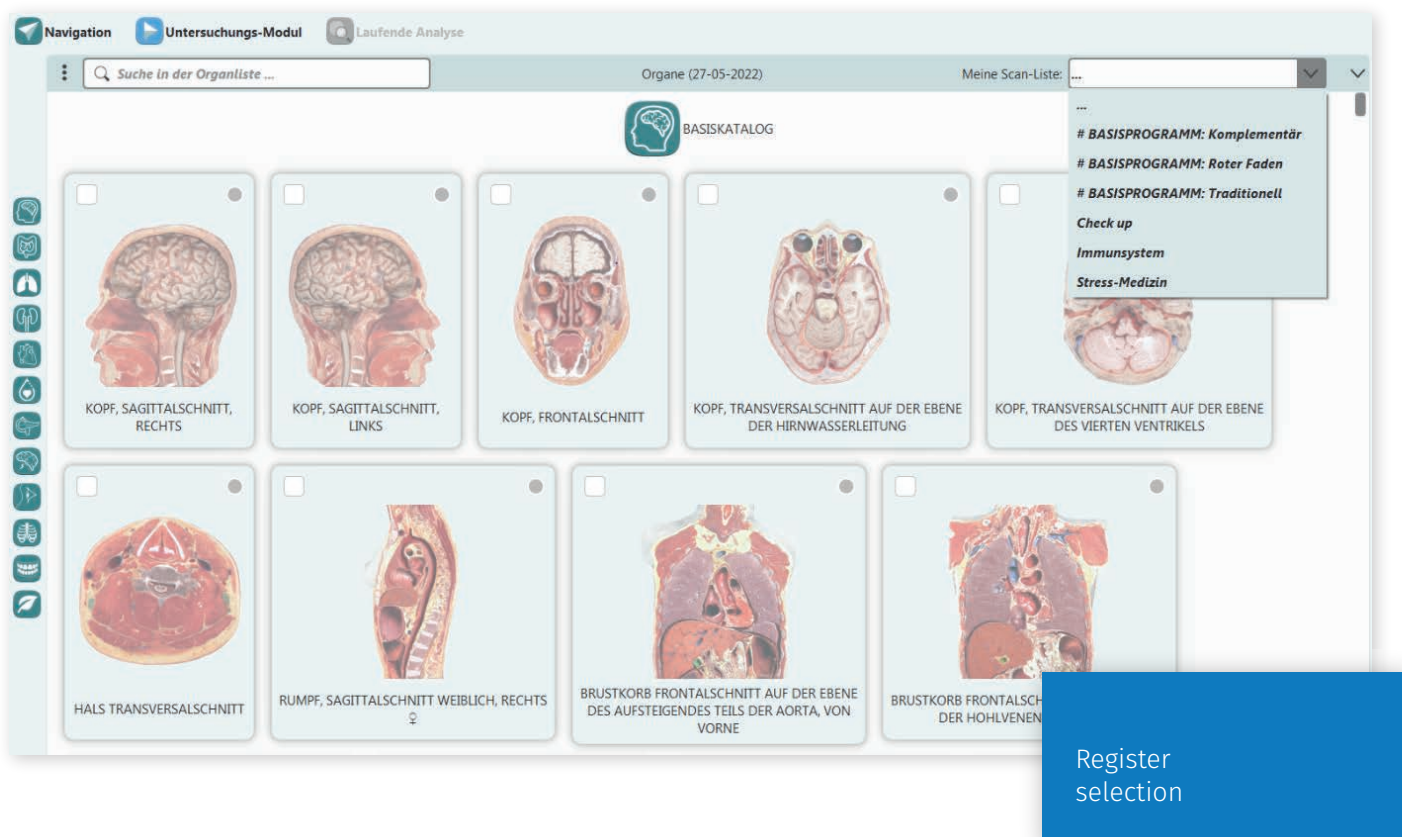

Customized diagnostics and therapy

Go to the doctor informed

From now on you can go to your doctor informed, as you have already been able to do a subtle MNLS analysis. Help shape the course of your medical treatment and thus also the success of your therapy. Help your family, friends and clients to become healthier and to stay healthy for a lifetime.

Individuality is fun

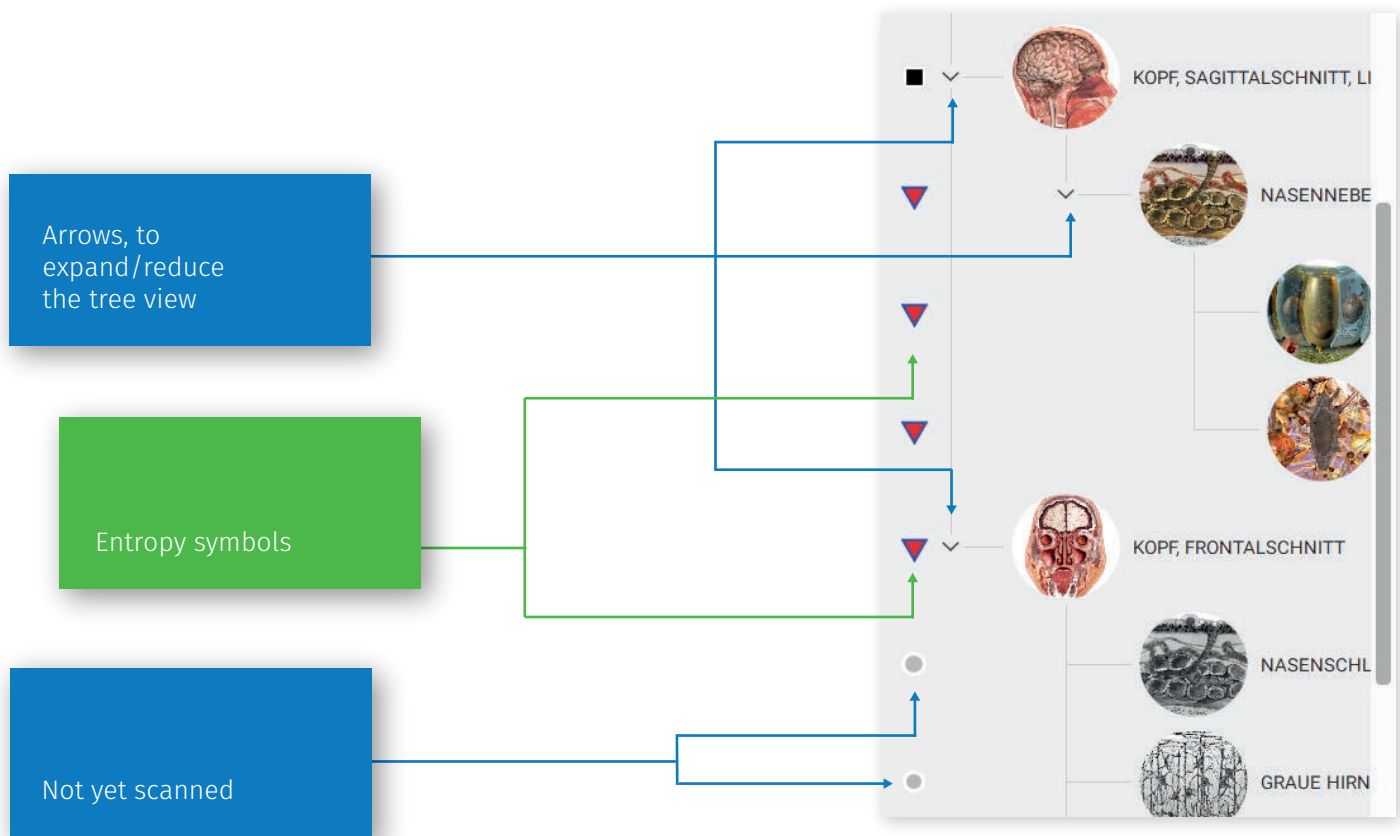

Particularly noteworthy is the custom-fit selection of registers in your new **METAVITAL** system ELEMENTARY. As this makes an analysis and also an extensive scan really fun. Detailed anatomical sectional images, countless measuring points and lots of information about the state of health of organs, tissues and functions in the organism give you a deep insight into the health and also the imbalances of the respective clients.

Customized diagnostics and therapy

Manual and training centre

The **METAVITAL** ELEMENTARY is easy to use, comes with an integrated very comprehensive interactive manual and more than 25 training videos in the free training centre, which explain in detail all the functions of the system in a practical way.

Medical and technical support

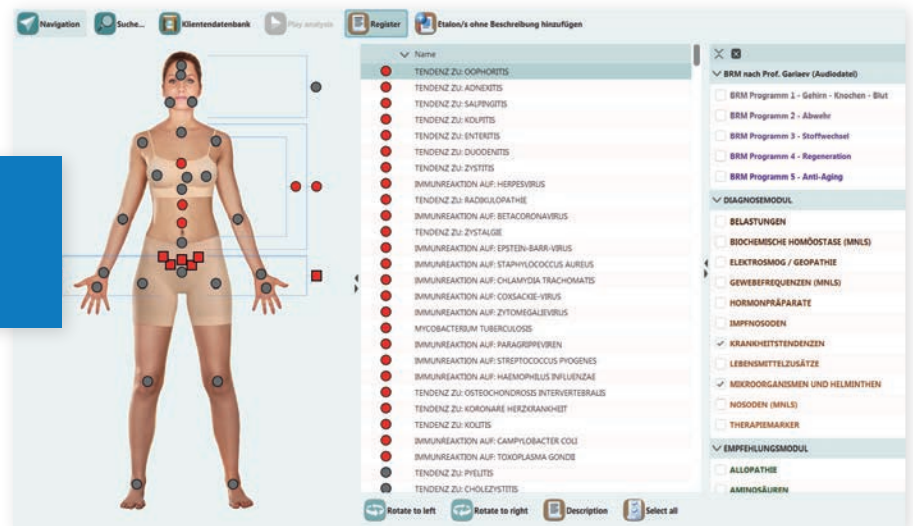

Of course, our medical department is there to help and advise you if you have any questions and need personal assistance. Our technical department is also trained to help you personally with your new system, should you need their technical expertise. The international **METAVITAL** team is there for you.

therapy

Customized diagnostics and therapy

The tooth module

Since not only holistic dentists know about the importance of the masticatory system for the entire organism, we have also expanded the database of frequency spectra to include the dental module and much more.

The chewing system

METAVITAL ELEMENTARY

Holistic treatment brings health to the whole body

Customized diagnostics and therapy

The psycho module

A comprehensive psychology module is waiting for you. This module is not only interesting for psychologists and psychotherapists, it offers you the possibility of a detailed Psychoanalysis, an assessment of the vegetative state as well as the stress level and many therapy options. The treatments also show great success in the area of burnout, mood instabilities, stress-related diseases and in any prevention of stress effects.

The psycho module

You can directly apply the knowledge from this module to effectively support pupils and students. Mental and psychological performance can also be sustainably strengthened and stabilised with the **METAVITAL ELEMENTARY** system. Our experts are there for you with their many years of experience in these areas.

Customized diagnostics and therapy

At a glance

Simple prescription of medicines

The **METAVITAL ELEMENTARY** is designed in such a way that you can quickly find out which remedies are particularly effective in the individual case using the various registers.

These remedies are, for example, in the registers: High potencies, homeopathy, gem therapy, Schüssler salts, phytotherapy, spagyric, nutritional supplements, Regenaplexes and much more. You can then apply the individual remedies subtly or prescribe them grossly, so that your clients can then buy these remedies in the respective pharmacy.

Creating subtle means

Not only the analysis shows excellent results, but also the optimised production of subtle remedies for your patients. You can apply any frequencies to a medium such as water, globules, ointment, chip, stones, etc. and thus make them available as long-term medication for the client.

Food lists

In this system, well-tolerated as well as poorly tolerated foods are listed. In addition, these lists are supplemented by the specific category "food stresses", which can provide information on intolerances, allergies and pseudo-allergies.

Dental module & Psycho module

Both modules provide you with specialized expert knowledge on detailed diagnosis and treatment options. An extensive database enables a great analysis and treatment for these demanding areas.

Comprehensive report

To enable you to document your clients in detail, the **METAVITAL ELEMENTARY** includes a comprehensive report module. All results are saved and assigned to the corresponding sectional views.

Clear analysis

Efficient tools for a quick and accurate overview of the clients issues start the scan allowing you to get straight to the important issues without preparation. You will not miss any information and you will be well prepared for a detailed assessment.

Detailed sectional views

Our new, very detailed and naturally anatomically correct sectional images, in combination with the outstanding measuring technology, enable you to obtain razor-sharp analysis results.

Biochemical homeostasis

Similar to the laboratory values from orthodox medicine and naturopathy, you can retrieve important information about the condition of an organ or a biochemical function here. This register is also suitable for identifying which blood values from orthodox medicine might be of particular interest to your clients. Biochemical homeostasis enables you to work efficiently with conventional medicine and other naturopathic approaches.
